Qiniso Xulu

Junior Software Engineer
Johannesburg, South Africa; qiniso.nhlakanipho.xulu@gmail.com
linkedin.com/in/qinisoxulu; github.com/qinisoxulu

PROFESSIONAL SUMMARY

Junior software engineer and WeThinkCode_ graduate with a strong foundation in Java, Python and object-oriented programming, and hands-on experience working in Agile teams with version control and CI/CD pipelines. Analytical and detail-oriented, with a collaborative mindset, strong verbal and written communication, and high learning agility. Practical IT support and operations experience from a university technical laboratory role. Seeking a software engineering graduate programme or junior developer role where I can contribute to a team, keep learning and grow.

EDUCATION

Software Engineering
WeThinkCode_, Johannesburg; Sep 2024 to Dec 2025 (completed 2025)

- Project-based training in Java and Python, applying Agile delivery, test-driven development and full software lifecycles in peer teams.
- Subjects: Programming Fundamentals, Object-Oriented Programming, Brownfield Development, Web Development, Cloud Computing.

BSc Computer Science
University of the Witwatersrand, Johannesburg; 2021 to 2023

- General Science (2021), then Computer Science (2022 to 2023). Studies were discontinued in 2023 following the withdrawal of NSFAS funding.
- Coursework: Data Structures and Algorithms, Analysis of Algorithms, Database Fundamentals, Computer Networks, Mobile Computing, Computer Organisation.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, Kotlin, JavaScript, TypeScript, PHP, SQL, C++, HTML5, CSS3
- **Frameworks and APIs:** React, SolidJS, LynxJS, Node.js, REST APIs
- **Databases:** PostgreSQL, SQL
- **Tools and DevOps:** Git, GitHub, GitLab, CI/CD pipelines, Docker, AWS (S3), Cloudflare R2
- **Practices:** Object-Oriented Programming, Data Structures and Algorithms, Test-Driven Development, Agile, Code Reviews

PROJECTS

Lynxkit: Expo-style Toolkit for LynxJS (github.com/lynx-kit)
Creator and Developer (open source), in progress

- Building an open source, Expo-style toolkit for LynxJS that lets developers build and test native Android features, such as notifications, without writing any Kotlin.
- Designing an auto-generated bridge that connects TypeScript code to the native Android side.
- Developed with LynxJS, TypeScript, Kotlin and npm.

Vennor: AI Study Platform for South African Students (vennor.co.za)
Founder and Developer (AI-assisted), Dec 2024 to Dec 2026

- Built and deployed a study platform with an AI tutor, flashcards with spaced repetition, auto-marked practice exams and a study planner with Google Calendar sync.
- Developed with SolidJS, Kotlin, LynxJS, PostgreSQL and Docker.
- I set up the CI/CD pipelines on GitHub and configured AWS S3 (Lynx bundle hosting) and Cloudflare R2. I used AI tools to assist with planning and frontend UI development.
- Followed Google API data policy requirements, showing attention to detail and a results-oriented approach.

Java, PHP and SQL Application
University of the Witwatersrand, Computer Science (second year, first semester), 2023

- Designed and built an application using Java and PHP, backed by an SQL database.
- Used SQL queries with Java and PHP code to store, retrieve and display data.

WORK EXPERIENCE

Peer Mentor
WeThinkCode_, Johannesburg; Sep 2025 to Jan 2026

- Reviewed first-year students' Python submissions through structured code reviews, reinforcing code quality, readability and sound structure.
- Coached junior engineers on debugging, problem decomposition and best practices, using clear verbal and written communication.

Technical Laboratory Assistant
University of the Witwatersrand, Johannesburg; Apr 2023 to Dec 2023

- Provided IT support and operations: managed lab access, maintained workstations, ran system updates and resolved hardware and software issues.
- Supported 3D printing and design work using Blender.

Mathematics Tutor and Volunteer
Edukit (Sijabulile High School); Feb 2022 to Jul 2022

- Tutored Grade 10 and 11 learners in core mathematics, building foundations for future STEM study.

CERTIFICATIONS

- Amazon Web Services (AWS) Educate Training Badges: Introduction to Cloud 101 (Nov 2025); Getting Started with Cloud Ops, Databases, Security, Networking, Storage, Serverless and Compute; Machine Learning Foundations; Introduction to Generative AI
- IBM: Python for Data Science; Data Analysis Using Python; Data Visualization Using Python; Applied Data Science with Python (Level 2)
- WeThinkCode_: Generative AI (Sep 2025)
- Credential links: linkedin.com/in/qinisoxulu/details/certifications
